RAINWATER GOODS

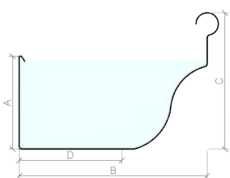

RAINWATER GOODS

When it rains, we're indoors innovating new ways to tackle the storms. Our range of rainwater goods keeps expanding: proof that we don't come down with the latest showers. Not only do we have the largest range of rainwater goods in South Australia, we also have the biggest downpipes and gutters.

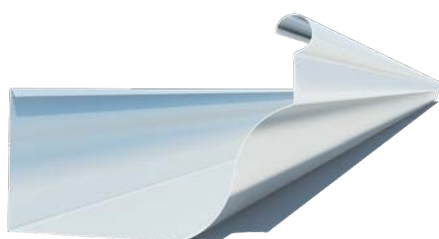

And while those who are dear to us tell us size doesn't matter, deep down, we know it does – especially when it come to carrying large volumes of water off your roof.

We also have the largest jobbing workshop, offering custom and standard capping, vents and rainheads.

GUTTERS

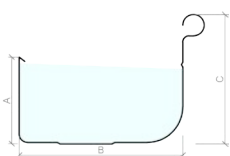

DIMENSIONS				
	A	B	C	D
	62	126	91	77
CAPACITY				
Standard	mm ² 7420			

115mm OG Gutter*

COMMERCIAL Mosman Gutter

With high water carrying capacity, the Mosman Gutter is the best choice for any commercial project. Available in a range of commercial based colours, you'll be pleased with your choice of gutter.

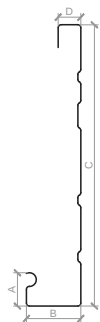

Flashings

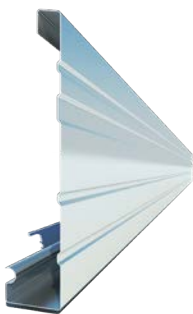

EDGE Building Products has successfully innovated the flashings business with our exclusive RevBend system. It's the world's fastest, most efficient and highly accurate 3D drawing and ordering system for flashings. It works with our robots 24 hours a day guaranteeing your order is processed for the next day. Flashings up to 8 metres long can be folded to any custom design -and you can also order the rest of your roof on it too, with RevBend's NEW catalogue feature.

Available with return*

FASCIAS

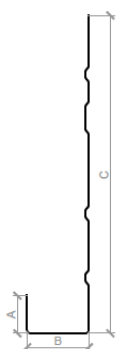

DIMENSIONS	A	B	C	D
	22	36	186	15

Metal Fascia

Easily installed and maintained, the metal fascia is a sturdy alternative to timber.

REVBIG DOWNPIPES

Revolution Roofing now roll steel round downpipes to length up to 6m. That's two storeys with one downpipe. No unnecessary cutting, or joining! And If you need to join them, we offer crimping and expanding services which are highly effective and aesthetic. With diameters from 60-300mm, Revolution Roofing will make sure all the water on your roof doesn't end up in your roof.

125x100
150x100

SQUARE DOWNPIPES

Our new machines now allow us to produce rectangular steel downpipes up to 4m in length. Available in a variety of dimensions, we make it easy (and hip) to be square.

CAPPING

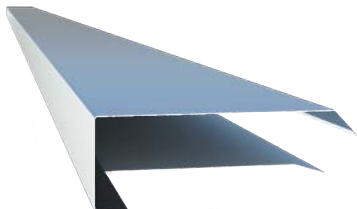

At EDGE, we offer a wide range of capping to complement all roofing styles from contemporary to heritage in a variety of finishes. These include the traditional soft feed .55 heavy gauge and modern Hi Tensile materials. Complete your modern home with our standard ridge, valley and barge capping.

RAINHEADS

We have a large range of custom rainheads to suit any building or project. Each is handcrafted to suit the unique requirements of the project and they are available in an endless range of finishes and sizes. Rainheads are a decorative finish to any building, while minimising the risk of water flow inside a building. We have a standard selection of rainhead designs, but they can be made to custom design for you special project.

Rainheads are available in a wide range of materials and finishes from UniCote[®] Steel, COLORBOND[®] Steel to Stainless Steel and even Heritage Galvanised. When ordering an EDGE rainhead, we recommend you discuss your requirements with an EDGE Building Products expert to ensure you consider all the important elements.
